

LAD CTO

shifting between strategies

Dr. Ahmed Said
Specialist Cardiologist
Shebin Elkoum Teaching Hospital

Presentation

- 70 years old woman known with hypertension, and diabetes.
- Chronic stable angina on optimum medical treatment.
- BP:120/75
- Heart rate: 60 bpm (on bisoprolol 10mg daily)
- clinical examination was normal.
- Normal LVEF, No Wall motion abnormalities.

Take Home Message

- In CTO, don't give up easily
- IVUS is mandatory.
- Don't stick to a single technique, CTO is shifting between different strategies.
